<b>October 2017 to Present</b>	British Chiropractic Association Professional Standard Committee
<b>October 2018 to Present</b>	British Chiropractic Association Director

**About Me:** I have continued to develop my special interests in treating soft tissue and sports injuries through postgraduate study. This includes electrotherapy, dry needling (medical acupuncture), myofascial cupping, the Graston Technique (a specialised soft tissue technique using shaped metal instruments), laser therapy, shock wave therapy, and taping techniques such as Kinesio and Dynamic taping.

Among my postgraduate qualifications is the ICSC (International Certificate in Sports Chiropractic), which enables me, as a sports chiropractor, to attend International Federation Games.

I have treated nationally and internationally as part of the British Masters Medical Team in France, Italy, Finland, Hungary, Birmingham, Cardiff, and London.

I have a particular expertise in working with power-based athletes, which has led me to support events such as Britain's and Europe's Strongest Man in 2019, England's Strongest Man in 2022 and 2023, and Oxfordshire's Strongest in 2024.

I am proud to be a Fellow of the Royal College of Chiropractic Sports Faculty. Currently, I serve as the elected Treasurer of the British Chiropractic Association and continue my work as Vice-Chairman of the Communications Committee for the same association.

I am a Master Instructor for FICS (The Fédération Internationale de Chiropratique du Sport) and regularly lecture both nationally and internationally, having spoken at seminars for chiropractors in Oxford, Chile, Belgium, Portugal, and South Africa. I have lectured in Oxford for the past seven years.

I also lecture nationally for the Royal College of Chiropractors as part of the International Certificate in Sports Chiropractic program.

I was born in Pontypridd, South Wales, where I lived and was educated. Outside of work, my interests include surfing, enjoying the great outdoors, playing the guitar, and classic cars.
