# BE IN THE ROOM

## ICSC EXTREMITY SEMINARS

DESIGNED FOR

- Sports chiropractors
- Chiropractic students in their final years
- Clinicians who want to expand and build on their skill base
- Anyone working with active patients and/or athletes

REGISTER NOW

### AFTER THE SEMINAR YOU WILL

- Learn techniques to support challenging patient scenarios that don't follow the traditional recovery path.
- Apply soft-tissue and joint techniques that athletes respond to.
- Use taping to support movement and performance.
- Build rehab progressions that hold up under load.
- Approach injuries with sport-specific awareness.
- Treat with speed, certainty and clear clinical decision-making under pressure.
- Continual access to the theory modules for post-seminar reflection.

[CLICK HERE - FICS MASTER INSTRUCTORS](#)

**Drawn from a global faculty, FICS instructors represent some of the smartest minds in chiropractic.** Outcome-driven and clinically proven, they are international leaders known for solving complex, unresolved injuries when others can't. This education is designed for doctors who want applied clinical skill, supported by the right theory, not buried in it. This is applied clinical mastery.

Demand real clinical results; expand powerful professional networks; and build a reputation as the go-to chiropractor in your community and internationally.

**Complete the seminar and earn the International Certification in Sports Chiropractor (ICSC),** preparing you to work in elite sport internationally with the confidence, credibility, and clinical skill trusted at the highest levels.
